String and printf Practice

By: Megan Avery
Updated March 2019

Before We Begin

- Make sure you have Java & Java JDK downloaded on your computer
  - can run `java -version` in terminal to check
- Make sure you have IntelliJ downloaded on your computer

Practice Program

Specs for Program:
- Create a String variable to hold your first and last name
- Print just your first name (using full name String)
- Print just your last name (using full name String)
- Print a version of your name with the first name capitalized
- Print a version of your name with the last name capitalized
- Print a version of your name with all the vowels capitalized
- Print the length of your first name, last name, and full name (using printf)

Hint: use String methods

The End
